MICUS ALARM AND CONTROL SYSTEM (MACS) LEITCH VIDEO SWITCH CONTROL

Leitch video and audio switches are commonly used in TV studios and by cable companies. These switches, and associated control panels, provide an extensive set of remote control features. *Micus Alarm and Control System (MACS)* adds to these capabilities:

- Access through local and wide TCP/IP networks
- Multi-user access from any number of local or remote computers
- Integration with other equipment managed and controlled by MACS

The following diagram depicts some of the configurations commonly used to control Leitch video and audio switches.

MACS Leitch equipment modules are immediately available from Micus Real Time Software Inc.
